## EXPLANATORY NOTES

1. **Source of Data:** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity. These types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any period include all goods declared on import entries received at DBS during the calendar period, and on electricity reports received within the following calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the period in which these imports actually occurred.
3. **Coverage:** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may, however, be an important difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.

The following commodity movements are excluded from import statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces or diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. 1 (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Number refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.
7. **Abbreviations:** Many descriptions of commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Import Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

## EXPLANATORY NOTES

1. **Source of Data:** Import documents collected by Customs are the basic source of import statistics, except for data on imports of electricity. These types of imports are reported by the importing firms directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Import statistics for any period include all goods declared on import entries received at DBS during the calendar period, and on electricity reports received within the following calendar month. There is a lapse of up to a week between the actual customs clearance of imports and receipt of the relevant documents in DBS. Electricity imports are usually included in statistics for the period in which these imports actually occurred.
3. **Coverage:** Import statistics include all goods which are cleared by Customs immediately on arrival in Canada, plus goods which are entered into customs warehouses. There may, however, be an important difference in the time at which warehoused goods are recorded as imports: some shipments which enter customs warehouses remain there for several months before clearance.

The following commodity movements are excluded from import statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 882-99) and a small amount of gold scrap in the form of jewellers' sweepings (class 258-99); current coin; settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign armed forces of diplomats stationed in Canada or brought back by Canadian armed forces or diplomats returning from postings outside Canada; temporary imports for exhibition or competition, and film imported for exhibition or processing or returned after exhibition or processing abroad; ships of British construction and registry imported for use in Canada, and ships purchased for use as international carriers but not used to carry goods between points in Canada; bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, generally, all temporary imports and goods merely moving in transit through Canadian territory.

4. **Countries Credited:** Imports are credited to the country in which the goods were located when first directed to Canada, except for goods produced in Central or South America but first consigned to Canada from the United States, which are credited to the country of origin.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Import Commodity Classification, Vol. 1 (DBS Catalogue No. 12-524). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment except in certain special cases otherwise defined in the Customs Tariff. Number refer to complete (or substantially complete) units imported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.

6. **Values:** The value of goods imported is usually the value as determined for customs duty. The Canadian Customs Act generally requires the valuation of goods f.o.b. point of shipment in the country of export, but importers often report c.i.f. values for free goods or goods subject to specific rates of duty. An effort is made to ensure that f.o.b. values are consistently used in import statistics.
7. **Abbreviations:** Many descriptions of commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Import Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.

EXTERNAL TRADE STATISTICS NOW AVAILABLE ON  
MICROFICHE CARDS AND MAGNETIC TAPES

The External Trade Division, Statistics Canada, announces that a number of its publications previously available in printed form only can now be purchased in the form of either 4" x 6" microfiche cards or magnetic computer tapes.

On the microfiche cards, each 8½" x 11" printed page is represented by an image which is 1/25 of the original size. Thus as many as 98 printed pages are contained on each card. For example, the report Exports by Commodities (65-004) for July, 1974 (264 pages) can be replaced by three 4" x 6" plastic cards. The quality of the images is good enough for use on very simple microfiche reading equipment. Microfiche reader-printers may of course be employed if full-sized hard copy is required. Microfiche cards will be available three to four weeks before the printed version of the corresponding report.

The information contained in the monthly bulletins Imports by Commodities (65-007) and Exports by Commodities (65-004) is also available on computer tapes. Each monthly tape contains, in addition to the latest month's data, revised data for all previous months of the same year at the level of commodity by country. Tapes containing monthly data for previous years (incorporating any revisions) may be purchased at any time. The data will be copied onto an industry compatible 9 track 1600 bytes per inch (BPI) tape using the Extended Binary Coded Decimal Interchange Code (EBCDIC), odd parity format. Additional record format information will be provided at the time of initial request. Monthly tapes will also be available earlier than the printed volumes.

These new services must be obtained on a contract basis, for a minimum period of one year in the case of monthly and quarterly reports. Interested users should therefore return the form below to the External Trade Division, indicating the services to be purchased. A contract will be forwarded for signature shortly after receipt of this form.

STATISTIQUE SUR LE COMMERCE EXTERIEUR MAINTENANT  
SUR MICROFICHES ET SUR BANDES MAGNETIQUES

La Division du commerce extérieur, Statistique Canada, annonce qu'il est maintenant possible de se procurer sur microfiches de 4" x 6" ou sur bandes magnétiques un certain nombre de ses publications auparavant disponibles sous forme imprimée seulement.

Sur les microfiches, chaque page 8½" x 11" est représentée par une image réduite à 1/25 de son format original. Par conséquent, chaque fiche peut contenir jusqu'à 98 pages imprimées. Par exemple, la publication Exportations par marchandises (n° 65-004) de juillet 1974 (264 pages) peut être remplacée par trois fiches de plastique de 4" x 6". La qualité de l'image est suffisamment bonne pour être utilisée sur un appareil de lecture très simple. On peut également se servir de lecteurs-imprimantes de microfiche si un exemplaire de format ordinaire est nécessaire. Les microfiches sont disponibles trois ou quatre semaines avant la version imprimée de la publication correspondante.

On peut également obtenir les renseignements contenus dans les publications mensuelles Importation par marchandises (n° 65-007) et Exportations par marchandises (n° 65-004) sur bandes magnétiques. Créées mensuellement, les bandes contiennent, en plus des données du dernier mois, les données révisées de tous les mois précédents de la même année, l'ensemble étant ventilé à la fois par marchandise et par pays. Des bandes contenant des statistiques révisées sur les années antérieures sont également disponibles. Les données sont copiées sur une bande à 9 pistes, 1600 octets par pouce (BPI) employant le code EBCDIC, à structure impaire. Des renseignements plus détaillés concernant la structure d'enregistrement seront fournis au moment de la demande initiale. Les bandes mensuelles seront également disponibles avant les volumes imprimés.

On peut bénéficier de ces services sur une base contractuelle, pour une période minimum d'un an dans le cas des publications mensuelles et trimestrielles. Les utilisateurs intéressés devraient retourner à la Division du commerce extérieur la formule annexée, indiquant les services qu'ils désirent acheter. Un contrat qu'ils devront signer leur sera envoyé peu de temps après réception de cette formule.
